As a highly motivated and forward-thinking professional, my passion for staying on the cutting edge of technological trends and developments drives me to constantly expand my skillset and adapt to the ever-evolving tech landscape. As such, I'm seeking a rewarding long-term opportunity with a company that shares my core values of innovation, collaboration, and inclusivity.

EDUCATION

Bachelor of Science in Computer Science (2024)

Point Park University

Developed a greater comprehensive understanding of core technical and leadership principles through specialized coursework in Data Structures, Software Engineering, Team Leadership, Database Management, and Project Management.

Master of Arts in Public Relations, Social Media, and Advertising (In Progress - 2027)

Point Park University

Gained advanced expertise in strategic brand management and digital outreach through hands-on coursework in Public Relations, Social Media Marketing, Advertising Strategy, Content Creation, and SEO.

PROFESSIONAL EXPERIENCE

Website Administrator (May 2024 - Present)

Pennsylvania Macaroni Company

- Oversaw the daily management of the site, adding new products and maintaining precise inventory levels to ensure a seamless customer purchasing experience.

- Engineered and deployed key front-end components using HTML, CSS, and JavaScript to enhance site functionality and improve the overall user experience.

- Modernized legacy code and implemented a mobile-first, responsive design using CSS, ensuring a seamless user experience across all devices.

Application Development Co-Op (May 2023 - September 2023)

First National Bank

- Developed an internal Angular application to track loan borrowers' records, including payment history and key metrics, significantly improving the management process for the loan administration team.

- Refactored complex, hard-coded pages into reusable, lightweight components- significantly promoting dry, efficient programming principles, resulting in a significant reduction in development time.

- Redesigned the application's user interface, addressing its previous lack of styling and responsiveness across devices by implementing modern design principles and component-based architecture to enhance usability, accessibility, and compatibility.

Technology Supervisor (April 2022 - May 2023)
Staples

- Provided hands-on technical support for customer devices, diagnosing the root cause of hardware failures before performing necessary component swaps.

- Enhanced device performance and security by conducting disk cleanups using anti-malware and threat removal tools, safeguarding customer data and restoring system functionality.

- Analyzed store and district performance metrics to identify key areas to improve upon, constantly promoting individual and collaborative growth.

Team Lead (September 2022 - November 2024)
The Outreach Team

- Managed the daily logistics as a supervisor for a 40-person canvassing team, leading strategy meetings and coordinating daily field launches.

- Supported local communities by tailoring explanations of complex civic issues, like urban development and public safety, to concerns identified through one-on-one dialogue with residents.
